TO TREE PLANTERS:

With the recent copious showers, the time to plant trees is now most propitious.

We give herein a list of trees and vines still unsold as per our stocklist of this date. Note particularly the standard varieties of Clingstone Peaches, Drying and Shipping Peaches, Pears on both French and Jap root, Cherries on Mazzard and Mahaleb root, Prunes on Peach and Myrobolan root, Apricots on Cot, Peach and Myrobolan root, Grapes, etc., still available for your planting.

While many of the standard sorts are selling out, yet from the large stock and varied assortment we propagate and grow, you will note that our selection for commercial planting is still fairly complete.

DO NOT GAMBLE WHEN YOU ARE BUYING TREES -- our special service and Ten Times Guarantee absolutely assure to you the trueness to variety of the trees you plant, A CONSIDERATION THAT OFFSETS MANY TIMES ANY FEW CENTS DIFFERENCE IN PRICE for which you may buy cheaper trees.

Our foothill grown trees, for good roots, well toughened wood fiber, hardiness, careful grading, careful selection and propagation, are the best in the State.

THE BEST ONLY IS THE CHEAPEST. Considering the quality of our stock, the service we give, and the absolute guarantee, our trees are not only the best, but, in the end, the cheapest you can buy.

Look carefully over the within stock list, and whether you are planting for commercial orchard, for replants or for home orchard, make your selection and get your order in at once for your tree requirements.

Our digging and yarding has been completed and we are prepared to make immediate delivery on all orders.

Fill out your tree wants on the order sheet enclosed, and mail it today.

Very truly yours,  
THE SILVA-BERGTHOLDT CO.

Sec. & Mgr.

P.S.--Descriptive catalogue will be mailed on application.

J.E.B.

## STOCK LIST

## SPECIFICATION OF GRADES AND SIZES

It is more important that a tree be of a good caliper, well rooted and stocky, than that it be a certain prescribed length. Therefore, the caliper determines the grade of the tree.

Realizing this fact, irrespective of height, we have for several years been grading our trees by caliper instead of by height, and, as a result, a whole lot of trees that we put out, for instance, as our 3/4' grade, graded by caliper 3/8 inch to 1/2 inch in diameter, two inches above the bud, would, instead of being a 3/4' tree, measure in length 4/6', and oftentimes, as in the cases of Prunes and Plums, 6/8'.

As a result many other nurserymen, grading by length, would be putting out trees, for instance, as a 4/6', that we, in our grading, would put out as a 3/4'. This tends to confusion, and, in view of the fact that the length never determines the grade of a tree, but the caliper and stockiness always determines the grade, we have determined to designate trees by caliper, as they should be, and not by length, inasmuch as the length does not mean anything, and merely allows some scalawag nurserymen to force the growth of their stock by suckering high, making

them grow spindling and long, so as to get them into the higher grades, losing sight of the important feature, and that is, the caliper and stockiness of the tree.

We have therefore adopted the following specification of grades:

3/8 inch and up in caliper (formerly designated as 6 to 8 feet).  
1/2 inch to 3/8 inch in caliper (formerly designated 4 to 6 feet).  
3/8 inch to 1/2 inch in caliper (formerly designated 3 to 4 feet).  
1/4 inch to 3/8 inch in caliper (formerly designated 2 to 3 feet).  
3/16 inch to 1/4 inch in caliper (formerly designated 18 to 24 inches).

In Plums, Prunes, Pears and Cherries, 3/4 inch and up will be the largest grade.

In Peaches, Apricots and Almonds, 1/2 inch to 3/4 inch will be the largest grade, and this grade in peaches, Almonds and Apricots will include all trees grading 1/2 inch and up.

Figs and Walnuts, being of uneven and very heavy caliper, will, as heretofore, still be graded by length.
